PROFESSIONAL SUMMARY

EC-Council Certified SOC Analyst (CSA) and MCA graduate seeking an entry-level SOC Analyst role. Hands-on experience in SIEM monitoring, alert triage, incident detection, log analysis, event correlation and network traffic analysis using Splunk, ELK Stack, Wazuh, Wireshark and Suricata. Skilled in phishing email investigation, IOC extraction, threat intelligence enrichment and MITRE ATT&CK mapping, with structured incident documentation and escalation. Strong foundation in networking (TCP/IP, DNS, HTTP/HTTPS), Linux and Python/Bash scripting for security automation.

CORE COMPETENCIES

SOC Operations: Alert Triage, Incident Detection & Response, Event Correlation, Log Analysis, SIEM Monitoring, Threat Intelligence, Threat Hunting, IOC Investigation, Phishing Analysis, Incident Escalation, False Positive Analysis, Incident Reporting, Playbooks, Cyber Kill Chain, MITRE ATT&CK

SIEM & Detection: Splunk (SPL), ELK Stack, Wazuh (HIDS), Suricata (IDS/IPS), Detection Rules, Use Cases, Dashboards, Alerting

Network Security: Wireshark, tcpdump, Nmap, Packet Analysis, TCP/IP, DNS, HTTP/HTTPS, OSI Model, Firewall Concepts, Network Traffic Analysis

Email & Threat Analysis: SPF, DKIM, DMARC, Email Header Analysis, MXToolbox, Malicious URL & Attachment Analysis, Social Engineering, Malware Triage

Vulnerability & Web Security: Burp Suite, Metasploit, Vulnerability Scanning, Vulnerability Assessment, OWASP Top 10, SQL Injection, XSS, HTTP Interception

Systems & Scripting: Linux (Kali, Ubuntu), Windows, Windows Event Logs, Bash, Python, Django, REST APIs, HTML, CSS

EXPERIENCE

Cybersecurity Trainer – Red Team Hacker Academy

2026

- Trained students on core cybersecurity and SOC concepts, including SIEM monitoring, alert triage, log analysis and incident response.
- Designed and managed 10+ hands-on lab environments using Splunk, Wireshark, Suricata and Nmap, simulating real-world attack scenarios.
- Taught attacker tactics and techniques using the MITRE ATT&CK framework and guided learners through structured investigation workflows.

Cyber Security Intern – Red Team Hacker Academy

2026

- Completed a security-operations-focused internship covering SIEM monitoring, threat detection, vulnerability assessment and incident investigation (CICSA).

PROJECTS

Phishing Email Analyzer

2026

- Analyzed suspicious emails by inspecting headers, sender details, embedded URLs and attachments to identify phishing indicators.
- Validated SPF, DKIM and DMARC results with MXToolbox and traced message origin through mail server hops.
- Investigated embedded links and attachments for malicious behavior and identified social engineering tactics.
- Extracted IOCs (malicious domains, IP addresses, file hashes) and documented them for threat reporting.
- Classified emails as legitimate, suspicious or phishing using a structured SOC workflow and wrote formal incident findings.
- Automated IOC extraction and parsing with Python scripts, reducing manual investigation time and improving reporting accuracy.

SOC Home Lab & TryHackMe Practice

Ongoing

- Practiced SIEM log analysis, alert triage and threat detection in hands-on labs using Splunk, Wazuh, ELK and Suricata.
- Documented projects and investigation reports on GitHub (soc-analyst-portfolio) using a structured report and README format.

CERTIFICATIONS

EC-Council Certified SOC Analyst (CSA) – Cert No. ECC4368725190

Mar 2026

CICSA – Certified Internship in Cyber Security Analyst – Red Team Hacker Academy

2026

EDUCATION

Master of Computer Applications (MCA) – CCSIT Thalikulam, University of Calicut

2023–2025

Bachelor of Computer Applications (BCA) – AWH College of Science and Technology

2019–2022
